

A town-hall meeting will be held on Wednesday, February 7th, at 6:00 PM at the Sterling County Community Center to hear from Centerline Engineering and Trifecta Equipment Contracting regarding the next phase of the **Sterling City Roadway Improvements Project**.

The purpose of this town-hall meeting will be to re-introduce the construction team to the citizens who will be impacted by construction. It is important that all parties involved understand the planning and safety measures that will be used during construction. All best efforts will be taken to ensure safe access to all properties adjoining active construction zones. This meeting will allow the public to personally meet the construction team, hear about the projected construction schedule, ask questions related to the construction project and establish proper communication channels for any issues that arise during the construction phase.

Mike Knittel

Sterling County Judge
